

Address Workforce Shortages in Healthcare with Recruitment and Training

As a valued member of the BC Care Providers Association (BCCPA), we are thrilled to offer fellow members an exclusive opportunity to address the shortages of HCAs, LPNs, and other healthcare professionals in your senior care homes.

We are Canada’s largest private post-secondary institution, with 22 campuses nationwide. For decades, our graduates, including local and international Health Care Assistants, Practical

Nurses, and other healthcare support professionals, have supported senior homes across BC, including remote areas.

To combat workforce shortages and high staff turnover in senior care facilities, we provide tailored recruitment and training for HCAs, LPNs, and other healthcare roles, ensuring BCCPA members have a consistent supply of skilled, dedicated professionals—both local and international.

Employers

What We Offer
