Introduction

Healthcare in Canada

The Great Healthcare Debate
resolutions

Appendix

INTRODUCTION

Objectives and methodology

- **HealthCareCAN/NHLC** commissioned Ipsos to conduct survey research among the Canadian public on a variety of issues confronting the health care system today.
- The research was conducted in support of the **National Health Leadership Conference**, and specifically to test public opinion with respect to the resolutions at issue during the **Great Canadian Healthcare Debate**.
- The results were obtained through the Ipsos eNation **online** Omnibus survey of Canadian adults.
- Questions were fielded between **May 18 and 23, 2016** among a sample of **n=1,004 Canadian adults**.
- The sample is balanced and weighted on region, age, gender, and education to **represent** the Canadian population according to the most recent Census data.
- The confidence interval; for a sample of this size is **+/-3.1%**.

Executive Summary

- Healthcare is the most top-of-mind concern for Canadians (along with unemployment, each at 4 in 10) and while perceptions of the country's healthcare system have improved from last year (80%, +5), many Canadians have concerns. Majorities **worry** about:
 - The **risk of infection** at hospitals/healthcare facilities (70%)
 - **Falling through the cracks** (68%)
 - That the system is **falling behind other countries** (64%)
- Indeed, many (43%, +3) have friends/family who have looked into healthcare services outside of their province.
- Those **most concerned are those with the most first-hand experience**.
 - **Informal caregivers** (Canadians caring for an adult loved one) and Canadians **suffering from a chronic condition** are most likely to be worried on all counts.
 - Correspondingly, **women** are more concerned than men and likelihood to **worry increases with age**.
- Regionally, it's residents of **Quebec** who **worry most**.

Executive Summary

In advance of the **Great Healthcare Debate**, the public was asked about **five resolutions**:

1. Public reporting of the 15 preventable events

- Two-thirds of Canadians are concerned about “preventable events” happening in hospitals in Canada and most (59%) worry for themselves personally, particularly in Quebec (69%).
- Accordingly, virtually all **support mandatory reporting and regulatory bodies**.

Executive Summary

2. Truth and reconciliation commission health-related recommendations on indigenous health

- Seven in 10 Canadians are concerned about the health disparities of our Indigenous populations.
- Strong majorities are **supportive of governments working with First Nations leaders** to set clear goals and also addressing all of the social determinants of health.
- That said, 8 in 10 believe the Indigenous healthcare concerns will only be solved with a **new approach** from government. The same proportion think that governments should establish a **Federal/Provincial Health Authority**.

Executive Summary

3. Adopt key recommendations of the report of the advisory panel on healthcare innovation

- Canadians believe our country has a lot to learn from other countries in how to make their health systems more sustainable.
- Nine in 10 think the federal government should **invest substantially** over the next five years to support innovation in the health system and that **finding new ways of delivery is the only way we'll be able to keep up with demand.**

Executive Summary

4. National seniors health promotion action plan

- Eight in 10 Canadians are concerned about the healthcare available to seniors today; this number increases among women (85%) and those 35+.
- Indeed, 9 in 10 say the government should report on progress for a **National Seniors Health Promotion Strategy**.
- Majorities are concerned about the quality of life as longevity increases (84%), believe seniors need more education on taking care of their health (88%) and that system should provide the right tools (92%).

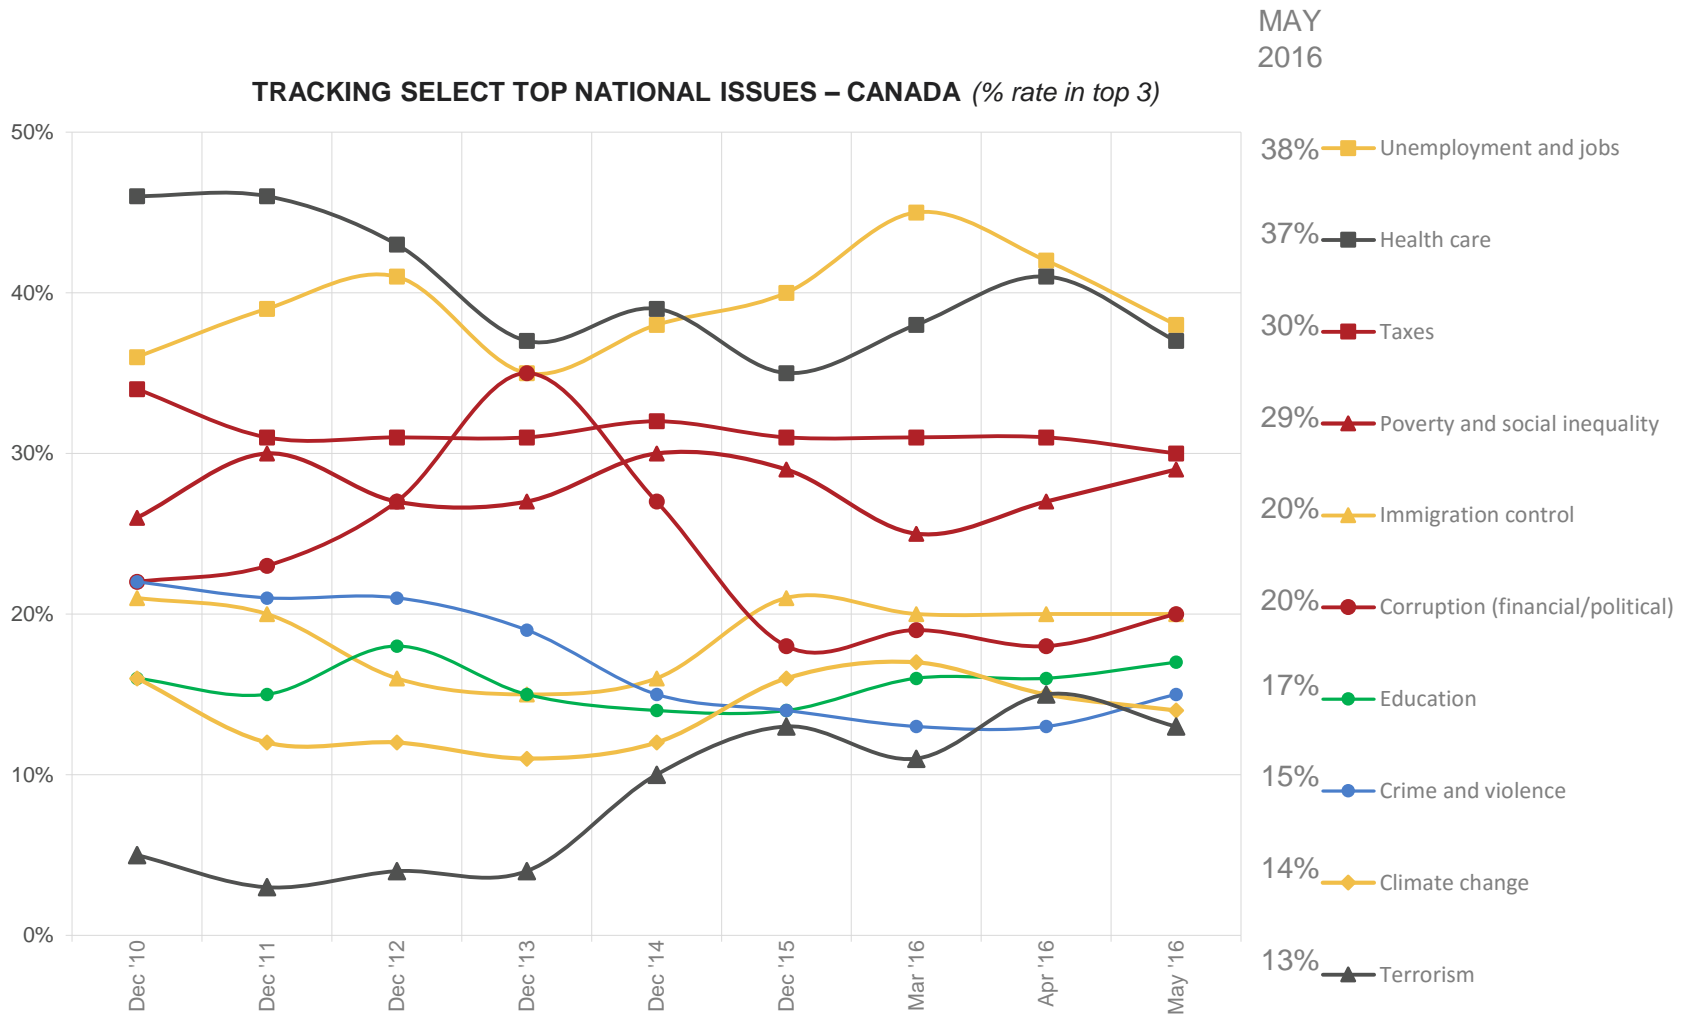

Executive Summary

5. Accountability for home and community care

- In the same vein, majorities are concerned about the healthcare available to seniors today and are split on whether or not there is enough support to age at home.
- Indeed, most feel homecare is unaffordable (84%) and are concerned about access to quality home/long-term care (85%).
- A full 9 in 10 say this is something that **governments need to address**.

HEALTHCARE IN CANADA

Healthcare is Canadians' top priority, along with jobs

Which three of the following topics do you find the most worrying in your country? (List provided)
 Source: Ipsos Global @dvisor

Comparatively, perceptions of Canada's healthcare system has improved

However, the proportion of Canadians who know someone who has looked into health services elsewhere has also increased.

S1. Please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements?
 Base: All Respondents May 2016 (n=1004), May 2015 (n=1230)

Canadians strongly expect Liberals to fulfil promise to work more closely with provinces to improve health

■ Strongly agree ■ Somewhat agree ■ Somewhat disagree ■ Strongly disagree %Agree

I expect the new federal Government to deliver on its commitment to work more closely with Provincial Governments to improve the health of Canadians as part of a multiyear Health Accord.

S1. Please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements?
Base: All Respondents (n=1004)

Canadians have many concerns about their healthcare system and worries have intensified

Quebecers are particularly concerned: 80% are worried about the risk of infection at hospitals, 74% worry that they'll fall through the cracks, and 75% worry that the Canada's health system is falling behind that of other countries.

S1. Please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements?
 Base: All Respondents May 2016 (n=1004), May 2015 (n=1230)

Informal caregivers, chronic sufferers, and women among the most worries

3/4

Informal caregivers worry about infection, falling through the cracks, that the system is falling behind other countries.

3/4

Chronic sufferers worry about infection, falling through the cracks.

7/10

Chronic sufferers worry the system is falling behind other countries.

3/4

Women worry about infection, falling through the cracks.

Results based on the percent who strongly or somewhat agree with several statements.

Question: Please indicate whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.

Base: All respondents (n=1004)

Likelihood to worry increases with age; decreases with income

Top 2Box	Total	Age			Income			
		18-35	36-54	55+	<\$40K	\$40K - <\$60k	\$60K - <\$100K	\$100K+
Base:	n=1004	n=274	n=359	n=371	n=64	n=184	n=436	n=320
I worry about the risk of infection at hospitals and other health care facilities in my area.	70%	51%	74%	80%	79%	68%	71%	64%
I worry that I will someday fall through the cracks in the health system.	69%	60%	73%	71%	78%	65%	73%	60%
I worry that the Canadian health system is falling behind compared to other countries	64%	54%	69%	66%	74%	61%	64%	62%

Results based on the percent who strongly or somewhat agree with several statements.
 Question: Please indicate whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.
 Base: All respondents (n=1004)

Most Canadians think personal health can be improved with access to the right info

S1. Please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements?
Base: All Respondents (n=1004)

The
**GREAT HEALTH CARE
DEBATE
RESOLUTIONS**

Resolutions

1. Public reporting of the 15 preventable events
2. Truth and reconciliation commission health-related recommendations on indigenous health
3. Adopt key recommendations of the report of the advisory panel on healthcare innovation
4. National seniors health promotion action plan
5. Accountability for home and community care

Public Reporting of the

15 PREVENTABLE EVENTS

Two in 3 Canadians worry about “preventable events”

Three-quarters of informal caregivers are concerned about these preventable events.

The US and UK have identified and publicly report on what they call never events for healthcare. Never Events or Preventable Events are patient safety incidents that lead to serious harm or death and are deemed to be preventable. They include things like having the wrong body part operated on or a tool left in you during surgery, being given a medication that you know you are allergic to, or a baby being abducted or discharged to the wrong person.

1. How concerned are you about these “preventable events” happening in hospitals in Canada? Very concerned, somewhat concerned, not very concerned, not at all concerned.
Base: All Respondents (n=1004)

Patient Safety and Reporting Outcomes

93% Support mandatory public reporting of preventable events...

92% Think hospitals need to have the same type of regulatory bodies as airlines to ensure public safety...

70% worry about the risk of infection in hospitals and other health care facilities in their area....

68% Are concerned about preventable events happening in hospitals and other health care facilities in their area...

59% Worry preventable events would happen to them if they were hospitalized.

Results based on the percent who strongly or somewhat agree with several statements.
Question: Please indicate whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.
Base: All respondents (n=1004)

Canadians personally concerned about preventable events

Quebecers are the most concerned about preventable events occurring if they were to be hospitalized.

% Agree – Worried preventable events might occur if they were to be hospitalized

Familiar

How familiar are you with the First Nations Health Authority that has been created for devolution of responsibility of federal and provincial governments to British Columbia First Nations for improving the health of Indigenous Canadians living in British Columbia.

4. How familiar are you with the First Nations Health Authority that has been created for devolution of responsibility of federal and provincial governments to British Columbia First Nations for improving the health of Indigenous Canadians living in British Columbia.
Base: BC Respondents (n=124)

Health Care for Indigenous Population

89% support governments working with First Nations leaders in establishing clear goals and targets in reducing health disparities.

89% To solve the health issues faced by Indigenous patients, governments need to work with indigenous communities to address all of the social determinants of health, such as poverty, poor living conditions, low levels of education, and healthcare access.

78% I am optimistic that if Canadian governments make improving Indigenous health a priority Indigenous Canadians can have the same health status as other Canadians.

HOWEVER

82% Believe that the health concerns faced by Indigenous patients will not be solved unless a new approach is used by the federal and provincial governments in delivering health care services.

Results based on the percent who strongly or somewhat agree with several statements.
Question: Please indicate whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.
Base: All respondents (n=1004)

Canadians call for new approach to Indigenous healthcare

Residents of Western Canada less apt to believe Indigenous health concerns won't be solved without a new delivery approach.

% Agree – That the health concerns faced by Indigenous patients will not be solved unless a new approach is used by the federal and provincial governments in delivering health care services.

Base: All respondents (n=1004)

Strong majorities agree with proposed notions around Indigenous health improvements

■ Strongly agree
 ■ Somewhat agree
 ■ Somewhat disagree
 ■ Strongly disagree
 %Agree

I support the collection and public reporting of data about Indigenous health problems such as infant mortality, suicide, mental health, chronic diseases and addictions so that the public is kept informed on whether these problems are being addressed.

89%

In areas where there is a significant aboriginal population, hospitals should have strategies and plans developed specifically for providing services to Indigenous Canadians.

83%

I think it would be a good idea for my Provincial Government and the Federal Government to establish a Federal/Provincial Indigenous Health Authority to ensure both levels of government and Indigenous communities are working together to improve the health of Indigenous peoples.

81%

5. Please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements about indigenous health?

Perceptions around preventative healthcare up

Canadians agree that some seniors are more vulnerable than others.

9. Please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements about seniors health?
 Base: All Respondents May 2016 (n=1004), May 2015 (n=1230)

Preventative Healthcare for Seniors

82% Say it's a good idea for any new government healthcare funding to go toward programs that help promote better health and prevent chronic illnesses rather than putting new money into treating existing illnesses.

HOWEVER

91% Say governments need to do more to help seniors and their family caregivers to manage their chronic health conditions.

62% Expect to be very responsible for the care of an ageing parent or grandparent in the near future.

Additionally...

- 84% are concerned that as Canadians live longer their final years will be mainly of poor quality as they cope with chronic diseases
- 88% believe seniors need more education around how to take responsibility for their health as they get older.
- 92% say the healthcare system needs to provide the tools and resources to Canadian seniors to enable them to live a healthier life.

Results based on the percent who strongly or somewhat agree with several statements.
Question: Please indicate whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.
Base: All respondents (n=1004)

Most expect to be very responsible for an ageing relative

Slightly less so in British Columbia.

Mandatory Frailty Screening

94% recognize that some seniors are more vulnerable and in need of more support than other seniors...

HOWEVER

69% say the system currently does a good job in providing preventative care that can help older Canadians remain healthier for longer

Results based on the percent who strongly or somewhat agree with several statements.
Question: Please indicate whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.
Base: All respondents (n=1004)

Accountability for

HOME AND COMMUNITY CARE

Community-based Health Care for Seniors

82% Are concerned about the healthcare available to senior populations in Canada today...

53% say there is enough health care support for seniors in their area to live at home as long as they are able to do so...

92% say Canadian governments need to address the limited access to seniors home care and the limited number of spaces in long-term care facilities

In addition...

- 84% feel homecare is unaffordable for most Canadians
- 85% are concerned about having access to high quality home and long-term care in their retirement years.
- 56% lack confidence that hospitals and long-term care facilities can handle the needs of Canada's elderly population.

Results based on the percent who strongly or somewhat agree with several statements.
Question: Please indicate whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.
