Delivery and MDEL Information

Our company is able to deliver and service proposed products within the following geographic boundaries: lower mainland
Our company has a valid MDEL. Our licence number is: 5934

It has come to our attention that the Ministry of Health Cheat Sheet for a basic wheelchair does not include a cushion. We expect that every basic wheelchair provided under this policy will require at least a 2" thick foam cushion with a fluid resistant cover. Please be sure to add details and pricing for the supply of a basic wheelchair cushion with each of the wheelchair options you propose in your bid. Your cushions might best be listed separately since some care homes may ask you to provide a specific type of cushion when placing orders.

Additional comments

No signature is required for this bid. As stated in the outline, this bid is not a binding document. Bidders are supplying this information and BC Care Provider Association members are receiving this information in an effort to help both parties gain an understanding of what products might be available for use as a basic wheelchair and what costs are involved.

It is anticipated BC Care Provider Members may use this information in selecting suppliers and subsequently obtaining products needed in an effort to meet Ministry of Health policy.
